Notification of pricing adjustment

Dear customers:

First of all, thank you for your support and trust in CINO. In the spirit of quality first and customer first, our company has been providing customers with high-quality products and services for many years.

Due to the shortage of materials, the impact of domestic and foreign semiconductors and chips, especially imported parts such as circuit boards, pumps, and plastic parts, has led to a continuous increasing in raw materials.

The rate of increase is as follows:

Copper: 48% (pump, power cord, solenoid valve, wire)

Aluminum: 26% (thermoblock, boiler)

Plastic: 46%;

Packaging: 45%

Silicone: 30%

PCB: Increasing every day

The above increasing rate is completely beyond what CINO could bear. CINO has to adjust the price range about 5%. The price adjustment plan will be formally implemented from May 10, 2021.

Regarding this product price adjustment, we hope that our distinguished customers will understand. If you have any questions, please feel free to call our company or the relevant salespersons. Hope to get your understanding and support.
